***Q. [Entry into force]***

86. The decision enters into force on the day it is published in the Official Gazette of the Republic of Kosovo.

## Reasoning

Measures to preserve public health and protect against COVID-19 have proven to be vital to limit COVID-19 transmission and reduce deaths. According to the latest reports of the National Institute of Public Health of Kosovo, the epidemiological situation with COVID-19 in Kosovo continues to be severe.

In such a situation, referring to the current data on the epidemiological situation and the recommendations of the NIPHK, the Government has taken measures whose main purpose is to preserve public health and prevent the spread of COVID-19.

Considering that in the state of available scientific knowledge, the risks of transmission of the COVID-19 virus are reduced among people who have been vaccinated, recently cured or who have just tested negative for the presence of the COVID-19 virus, the Government has taken restrictive measures, in order to control and prevent the spread of COVID-19, in activities and businesses which bring together a large number of people in the same place, and in which maintaining physical distance is difficult and thus poses an increased risk of virus transmission.

The measures taken are proportionate to the health risks caused and appropriate to the circumstances of the time and place, as well as based on the authorizations of Law No. 07/L-006 on Preventing and Combating COVID-19 Pandemics in the territory of the Republic of Kosovo. The measures taken through this decision do not define, in any case, the obligation of compulsory vaccination, since the restrictions imposed on the public can be met by presenting proof of vaccination status, the result of a test that concludes that the person is not infected with COVID-19, or that the person has recovered from COVID-19 and has sufficient antibodies.

The decision on measures against COVID-19 was based on an assessment of the situation of transmission intensity and the capacity of the health system to respond, but also by assessing them in light of the effects these measures may have on the overall well-being of society and individuals.

The Ministry of Health has coordinated decision-making with stakeholders, who have been directly or indirectly affected by the pandemic. The Government notes that these stakeholders have exercised their right to democratic influence in decision-making, in accordance with Article 45.3 of the Constitution.

The measures set out in this decision as well as the timelines serve to keep the epidemiological situation under control but do not exclude the possibility of undertaking new restrictive or mitigating measures.

Therefore, based on the recommendations given by the NIPHK, line ministries, stakeholders and relevant experts, it was decided as in the enacting clause of this decision.
