1. INTRODUCTION

During 2017 the Government of the Republic of Kosovo and the Municipalities continued supporting the projects of the non-governmental organizations in various areas of priority for the institutions of the Republic of Kosovo and Kosovan society. This financial support for NGO projects aimed to increase the cooperation with civil society, particularly with non-governmental organizations. It should be noted that with the support of the donors and international partners, during 2017 a lot of work has been done to improve the decision-making through the public consultation process in which non-governmental organizations and civil society play a significant role.

In addition, the government with the help of donors and the participation of non-governmental organizations for the first time managed to draft the secondary legislation, which specifies clearly the criteria, standards and procedures of public financial support for non-governmental organizations. The Ministry of Finance and the Office of Good Governance with the support of the Technical Assistance Project of the European Commission "*Support to the implementation of the Strategy of the government for Cooperation with the Civil Society*" have drafted a regulation on the criteria and standards and procedures of public financing for NGOs, as well as the monitoring and reporting methodology and the manual for its implementation. These documents have been consulted with all public institutions and non-governmental organizations. Public consultations have also been conducted and during their drafting a number of comments were taken into consideration and have been incorporated in the secondary legislation.

On July 1st, 2017 Regulation MF-No.04/2017 on the criteria, standards and procedures for the public financing of NGOs entered into force and the same was published in the Official Gazette of the Republic of Kosovo.¹ This regulation defines the rules by which the public financing of NGOs will be done in a transparent manner based on pre-defined criteria, competitively and while informing the public in a transparent manner on the beneficiaries and the priorities financed through public money. The 2017 European Commission Progress Report assesses positively the adoption of this secondary legislation, wherein it is stressed that "*the entry into force of two regulations that specify the consultation standards and define the criteria and procedures for the public funding of NGOs has paved the way to improve the governance and to enhance the transparency in the use of public funds.*"² The report also notes the need to improve the institutional capacities to act in accordance with the new

² Kosovo 2018 Report, pg. 9, available at: <https://ec.europa.eu/neighbourhood-enlargement/sites/near/files/20180417-kosovo-report.pdf>

requirements, by stressing that *"some ministries and municipalities are not ready yet to meet their obligations according to the new regulations."* And that *"there is still lack of technical capacities to execute effectively the budget allocated in accordance with the established regulations and procedures"*³

In March 2017 the Office on Good Governance/ Office of the Prime Minister published for the first time a report on the public financial support for the 2015 and 2016 period. This mandate was given to the Office on Good Governance by Regulation MF-No.04/2017 on the criteria, standards and procedures for the public financing of NGOs. The publishing of this report was also assessed positively by the 2017 Progress Report of the European Commission, wherein it is stated *"In March 2017, the Government published the first report on public financing. This constitutes a positive step toward a greater transparency in public funding."*⁴ The report also emphasizes that the published information should have contained more details. *"However, the type of the provided information still does not allow a significant analysis of the budget's execution"*⁵

The regulation that entered into force in July 2017 specifies in detail the information that public institutions must provide in relation to the public financing of NGOs. Moreover, it contains the standard reporting forms. The Regulation has also determined the role of the Office on Good Governance in preparing the Comprehensive Report on the public financial support to NGOs, which is prepared based on the reports of all public institutions. Therefore, the adoption of the legislation on the criteria and procedures for the public financing of NGOs has also resulted in a more structured monitoring and reporting method on the public financial support for NGOs.

The report on the 2017 Public Financial Support for NGOs is the second report prepared by the Government of the Republic of Kosovo about the public financial support to NGOs and covers all central and local level budget organizations that have provided any kind of financial support for non-governmental organizations. Considering that the Regulation MF-No.04/2017 on the criteria, standards and procedures for public financing of NGOs has entered into force on July 1st, 2017 it is still difficult to render accurate conclusions on the implementation of the regulation requirements by budget organizations. However, there are positive examples of the implementation of regulation requirements by the budgetary organizations. From contacts with budget organizations, it is noted that they have started with a more complete implementation of the regulation requirements starting from Fiscal Year 2018.

³ Ibid.

⁴ Kosovo 2018 Report, pg. 9, available at: <https://ec.europa.eu/neighbourhood-enlargement/sites/near/files/20180417-kosovo-report.pdf>

⁵ Ibid.

In terms of the reporting and accessibility of public financing from budget organizations for NGOs in 2017, we find there is room for improvement in the future. At the time when this comprehensive report was drafted, most of budget organizations had still not published on their websites their 2017 reports on public financing of NGOs, moreover, some of the organizations had not submitted them to the Office on Good Governance in accordance with the requirements of Regulation MF-No.04/2017. However, the majority of the budget organizations have prepared and submitted their reports. Consequently, this year again, the Office on Good Governance, in order to inform the public to the best extent possible on the public financial support for non-governmental organizations, has collaborated with the Ministry of Finance, namely the Treasury, to prepare a comprehensive report based on payments that budget organizations have executed for beneficiaries registered at the Treasury as non-governmental organizations. We consider that the publishing of this report shall contribute in increasing the transparency and accountability of public institutions and at the same time improve their cooperation with civil society in the Republic of Kosovo. We believe that the next report on the public financing of NGOs will be far more advanced, considering that Regulation MF-No.04/2017 has been implemented more fully since the start of 2018.

The Government of the Republic of Kosovo is dedicated to increase the transparency and accountability of public institutions and create the mutual trust between social society and public institutions. Therefore, the preparation and publication of this report serves to this purpose.

1.1 Used methodology

Office on Good Governance/Office of the Prime Minister, has requested all budget organizations to prepare and submit reports on their public financing of NGOs for 2017. However, bearing in mind that a large number of budget organizations failed to submit their reports in accordance with the requirements of Regulation MF-No.04/2017, Office on Good Governance used the data provided by the Treasury of the Ministry of Finance. Thus, the 2017 report on the public financial support for NGOs from the institutions of the Republic of Kosovo has been prepared based on the data obtained from the Ministry of Finances, namely the Treasury. The data obtained from the Treasury include all the payments that have been executed between January 1st and December 31st of the respective year for the suppliers registered with the Treasury as Non-governmental Organizations. These data are further structured according to ministries, municipalities and other agencies, and the same were forwarded to the respective institutions for validation, namely for comments. The comments of the institutions have been analysed in particular in relation to whether there was a public

tender or not for such support, and as much as it was possible to see the objectives of such financial support. However, not all budget organizations have responded and commented on the forwarded data.

Considering that the data obtained from the Ministry of Finances are grounded on the payments and not the financed projects or programs, for this report these data have been processed so that if an NGO has received within a year different amounts of money from the same institution or various departments of the same institution, they have been summed up and presented as one single financial amount for the same NGO within the respective year in the annexes attached to this report.

Although, specific projects in the framework of various institutions may have been approved with higher amounts than those presented in this report, since not all the approved amounts may have been executed during the fiscal year, in order to preserve the uniformity of the methodology of the used data, this report contains only the amounts executed and reported to the Treasury. Considering that Regulation MF-No.04/2017 has entered into force in the second half of 2017, we believe that the next reports, including the 2018 report will be more complete.

Office on Good Governance/Office of the Prime Minister is supported by the technical assistance project financed by the European Union Office in Kosovo *"Support for the implementation of Governmental Strategy for Cooperation with civil society."* The Office on Good Governance and the "Support for the implementation of the Strategy of the government for Cooperation with Civil Society" project team are not liable for the accuracy of data regarding the designations of NGOs or whether the names of suppliers registered with the Treasury and reported as non-governmental organizations and presented in this report, are in fact non-governmental organizations registered pursuant to the applicable law. The designations are presented as received from the Treasury.

2. GENERAL DATA ON THE PUBLIC FINANCIAL SUPPORT FOR NGOs FROM MINISTRIES, MUNICIPALITIES AND OTHER INDEPENDENT AGENCIES

From the collected and processed data on the public financing of NGOs in 2017, we can ascertain that cooperation with non-governmental organizations in the implementation of government priorities in various fields has continued with the same intensity. Also during 2017 both central and local institutions have continued to support projects and activities of non-governmental organizations, including the funding of specific projects or direct support to NGOs and their projects.

Based on the financial data obtained from the Treasury of the Ministry of Finances, which are based on the payments executed through the “free balance” system it turns out that the public financial support transferred to NGOs by public institutions including central institutions (The Assembly, the Presidency, Office of the Prime Ministry and Ministries), independent agencies and municipalities during 2017 is 16,029,756.00 Euro. This amount is approximate considering that in some cases organizations or specific projects may have been

presented in these statements although they are not non-governmental organizations.

Figure 1. Data on public financing of NGOs in 2017

If we compare the data on the public financing of NGO projects in 2017 with those in 2016 we see an increase in the overall financing of NGOs in 2017. This increase is mainly noticed at the central institutions’ level, while the 2017 data indicate a decrease of around 1 million Euros at the municipal level. The following graph compares the 2016 and 2017 data on the public financial support to NGOs in Kosovo from all budget organizations, divided according to the ministries, municipalities and other agencies:

Figure 2. 2016-2017 comparative data on public financing of NGOs

In 2017 a large number of NGOs has also benefited public financial support for their projects from both the central budget organizations and the municipalities. Compared to 2016, in 2017 a decrease in the number of benefiting NGOs is noticed. In 2017, 594 NGOs received financial support from Ministries, whereas in 2016 it was around 711 NGOs that received financial support. These data show that in 2017 the number of NGOs benefiting public financial support from Ministries decreased by 116 NGOs compared to 2016.

The number of NGOs benefiting from municipalities is higher than the ministries. During 2017 a total of 813 NGOs have benefited from the budget of all municipalities. However, even at the municipal level, we have a decrease in the number of NGOs that have benefited public financial support in comparison to 2016. The data presented in this report have been prepared based on the data obtained from the Treasury in the Ministry of Finances, and as such constitute any form of financial support that went to the suppliers who are registered with the Treasury as Non-governmental Organizations.

In the framework of other agencies, which mainly report to the Assembly, there is an increase in the number of NGOs that have benefited public financial support. In 2017 there were 18 beneficiaries of public financial support, whereas in 2016 there were 12 beneficiaries.

One of the factors that could have contributed to the decline in the number of the NGOs benefiting from both the ministries and municipalities may be related with the entry into force of Regulation MF-No.04/2017. As mentioned above this regulation has specified criteria and

procedures which budget organizations are obliged to observe upon providing public financial support to NGOs. Therefore, a decrease in the number of NGOs benefiting financial support might be interpreted as a sign of the observance of the criteria and procedures set forth in this regulation.

The following graph compares the number of public financial support beneficiaries from the ministries, municipalities and other agencies during 2016-2017:

Figure 3. Number of NGOs that have received financial support from budget organizations in 2016-2017

3. DATA ON THE PUBLIC FINANCIAL SUPPORT FOR NGOs ACCORDING TO MINISTRIES, MUNICIPALITIES AND OTHER AGENCIES

3.1 The Financial Support to NGOs from Ministries

The data presented below show the amount of public financial support that was provided in 2017 to NGOs according to respective ministries, and the same are compared to the previous year. In some of the ministries the public financial support to NGOs has increased, while in others we have a slight decrease. If we analyse the data on the public financial support, we may conclude that the institutions that have supported the most NGO projects are the Ministry of Culture, Youth and Sports, Office of the Prime Minister, Ministry of Labour and Social Welfare, Ministry for Communities and Return, Ministry of Agriculture, Ministry of Economic Development, Ministry of Education etc. Figure 4 below is a graphic presentation of the data on the public financial support for NGOs from the Ministries, Office of the Prime Minister and Office of the President in 2017 compared to the previous year (2016).

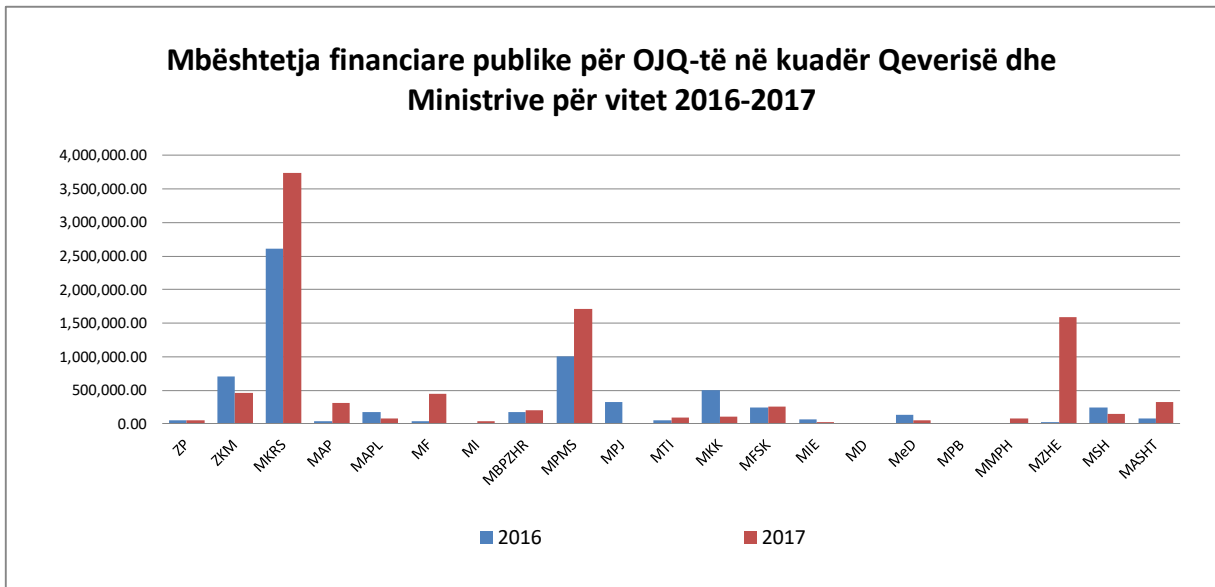

Figure 4. The amount of public financial support in 2016-2017 from the Ministries

3.1.1 The purpose of the financial support provided by the ministries

The Office on Good Governance addressed all the ministries to report on the public financial support to NGOs during 2017. In addition to the request, the Office on Good Governance also forwarded the standard reporting forms. However, only a small number of ministries reported in the required format. In addition, only a small number of the institutions that reported forwarded their information in a standard form and with the appropriate descriptions regarding the financed projects, objectives and beneficiaries.

A positive example among the ministries is the **Ministry of Labour and Social Welfare**, which in its reporting has also described the objectives of the financial support to NGOs, which were mainly supported in the field of social services, health care and also NGOs that support social categories with special needs. A good portion of this financial support was provided through a public call, while the rest was provided as direct support based on the individual requirements of beneficiaries.

The **Ministry of Diaspora**, has also filed a fuller report compared to other institutions. This ministry also reported that the public financial support to NGOs was implemented pursuant to a public call. Within this ministry, most of the supported projects were related to the diaspora, including among other cultural, sports, and literary activities.

The **Ministry of Health** has mainly supported the non-governmental organizations related to certain health occupations. In addition, a large part of the financing was implemented in cooperation with the municipalities to provide health services from several

non-governmental organizations. The health ministry has reported that the supported projects are mainly related to home and outpatient health care, disabilities, women and children. The main objectives of all the support were related to health maintenance and improvement. This ministry has not opened any public calls to finance these projects, but the same have been financed according to requests.

A report was also filed by the **Ministry of Economic Development**, which has mainly supported several activities related to economy. However, this report did not contain all the required information. The **Ministry of KSF** has also reported on the financing of NGOs, and that they mainly have to do with purchasing of training services from the beneficiaries that are registered as non-governmental organizations. **The other Ministries have failed in their obligation to report according to the requirements of Regulation MF-No.04/2017.**

Although the data obtained from the Treasury in the Ministry of Finances and the other available data were incomplete to understand the purpose and the objectives of the public financial support, from the data that are available to the Office on Good Governance it is clear that the public financial support to a certain extent is in line with the strategic objectives and the responsibilities of the institutions/ministries providing this public financial support. The Office on Good Governance with the aim of informing the public has analysed the data of all payments conducted by these institutions and based on the available basic data can ascertain that most ministries have supported NGOs within their responsibilities and priorities. However, there are also cases of financial support to NGOs, when this support is not directly related to the responsibilities of the institutions that provide financial support.

It is noticed that the majority of the support from the **Ministry of Culture, Youth and Sports** was directed to various sport federations and sport clubs. Sport Federations and Clubs in Kosovo are required to register as NGOs, thus they are presented as non-governmental organizations in this report as well. This ministry has also supported a large number of NGOs that have implemented among other culture and art projects.

The Office of the Prime Minister supported primarily NGOs that have implemented projects in various fields whose beneficiaries were NGOs coming from minority communities in the Republic of Kosovo, in particular the Serb community. The Office of the Prime Minister has conducted three public calls mainly by the Office for Community Issues. It is important to note that the **Office on Good Governance in the Office of the Prime Minister** at the end of 2017 has implemented a public call to finance projects in the field of protection from discrimination. Upon implementation these calls the regulation requirements were fully observed. However, since the call was completed in early 2018, the next report will include in detail the best practices and experiences regarding the implementation of the Regulation in relation to this call.

Considering that based on the available data, it is difficult to tell the difference between the directly financed and supported projects and programs, contracted services or purchases from NGOs, because these data also contain the contracted services, including education,

training services, etc. which are provided by registered non-governmental organizations. For example, many of the central institutions have paid for training services provided by the American University in Kosovo, which is registered as a non-governmental organization. Moreover, trainings in accounting and auditing are included as the organizations that provided the same are registered as non-governmental organizations.

3.1.2 The number of NGOs benefiting funding from the Ministries and the division of the amounts of financial support

Figure 5 below presents the number of NGOs benefiting from the Office of the Prime Minister, the Ministries and the Presidency. Although in many cases NGOs have received more than once payments from the same institutions the data below have been processed so that the figure below shows the processed data on the number of beneficiaries from each ministry; this implies that even in the cases when one NGO has benefited more than once during a year, for the purpose of this report the same is considered as one benefiting NGO. This means that within the amount more than one project may have been supported during the year.

The figure shows that most of the beneficiary organizations are part of the Ministry of Culture, Youth and Sport, Office of the Prime Minister, Ministry of Agriculture, Ministry of Labour and Social Welfare, Ministry of Health, Ministry of Education, etc. The most NGOs have benefited from the Ministry of Culture, Youth and Sports, namely 365 non-governmental organizations, followed by the Office of the Prime Minister with 77 beneficiaries, Ministry of Agriculture, Forestry and Rural Development with 75 benefiting NGOs, Ministry of Labour and Social Welfare with 45 benefiting NGOs, and so on.

Namely 594 NGOs have benefited in 2017 from the public financial support provided by the Ministries and as highlighted above we have a decrease by 115 benefiting NGOs in comparison to the previous year. Most of the NGOs that received financial support in 2017 had also been supported in the previous years. The following table presents the number of NGOs benefiting from public funds in 2017 according to each ministry. For comparison purposes we have also included the data on the number of beneficiaries from the previous year.

Figure 5. Number of NGOs supported according to Ministries in 2016-2017

From the analyses of the processed data on the public financial support for NGOs provided by the Ministries of the Government of the Republic of Kosovo, we may notice that the majority of non-governmental organizations have benefited up to 5,000 Euro. Out of a total of 594 benefiting NGOs in 2017, about 400 of them have received lower amounts than 5,000 Euro. 92 non-governmental organizations have benefited between 5 and 10,000 Euro. 45 non-governmental organizations have benefited between 10 and 20,000 Euro.

The figure below is a graphic presentation of the data pertaining to the number of benefiting NGOs according to the respective amounts and at the same time they have been compared with the previous year.

Figure 6. Number of benefiting NGOs according to specific amounts within ministries

3.2 Support from Municipalities

In 2017 Kosovo has a total of 38 municipalities, which are budget organizations as stipulated under the Law on Public Financial Management. Out of 38 municipalities, 37 have provided financial support for non-governmental organizations in 2017. Data from the Treasury in the Ministry of Finance show that in 2017 the municipalities have transferred a total of 6,052,311 Euro to the accounts of the non-governmental organizations. If we compare the amount of public funding to NGO projects by the municipalities in 2017 with the amount in 2016, we notice a decrease of 1.1 million Euro in financing for non-governmental organizations by the municipalities in 2017. The following figure shows the public financial support according to each municipality in 2017, and compares it with the previous year.

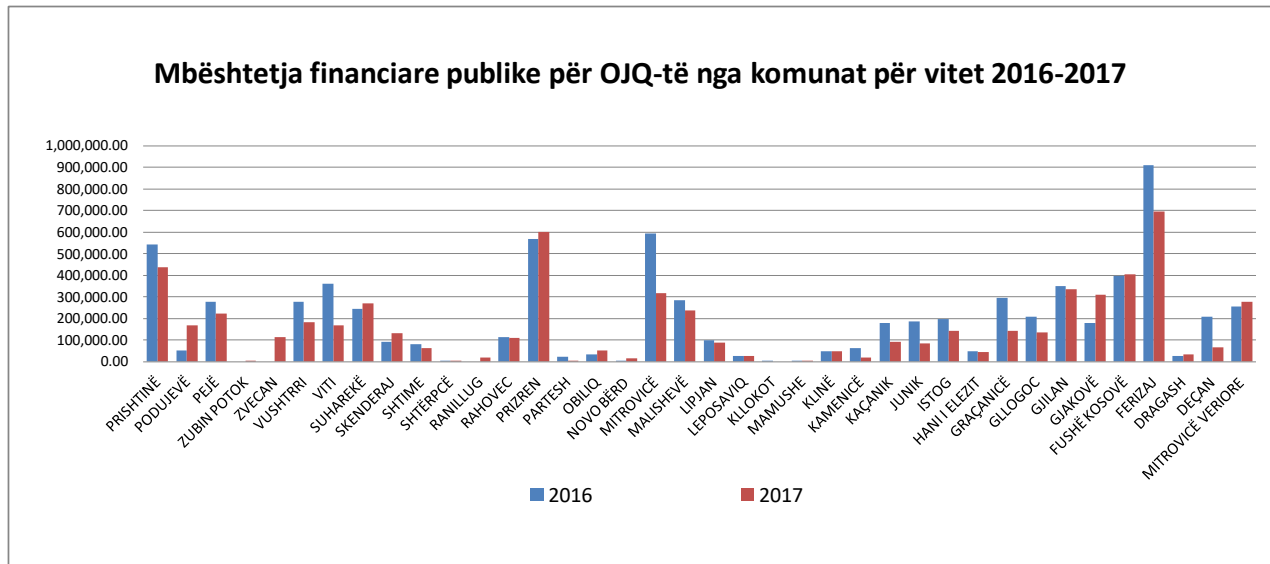

Figure 7. Public financial support for NGOs by the municipalities 2016-2017

3.2.1 Purpose of the financial support provided by the municipalities

The Office on Good Governance in the OPM based on the requirements of Regulation MF-No.04/2017, through the Ministry of Local Government Administration asked the municipalities to report separately on the public financial support they have provided during 2017. However, despite notifying the legal requirements and the demand to publish and submit to the Office of the Prime Minister reports as per Regulation requirements, not all municipalities have reported in the forms required under Regulation MF-No.04/2017. **About 30 municipalities have not submitted their reports in accordance with the requirements of Regulation MF-No.04/2017.** A number of municipalities, in total 8 of them have reported in the standard reporting form. Some of the objectives as well as the areas in which NGO projects have been supported by the reporting municipalities are summarized below. Considering that this was the first time such reporting was required as per the requirements of the regulation, there are positive reporting examples among the reporting municipalities.

Shtime Municipality has submitted its report on public financing of NGOs in accordance with the requirements of Regulation MF-No.04/2017. Most of the report has been filled out under all the required columns. From the reported data it is noticed that most of the public financial support was provided as direct support and through the decisions of municipality authorities. There were no reports on public calls to finance the NGO projects. Most of the supported projects are related to sports, culture and youth. In addition a number of projects are related to agriculture, and economic development. While several projects were aimed to

support persons with special needs. Most of the projects and beneficiaries reported by Shtime Municipality correspond to the data of public funding provided by the Treasury.

Gracanica Municipality has reported on the financial support provided during 2017. This municipality has included key data regarding the public financing of NGOs, including main activities. In this regard, it is noticed that mainly projects and activities of NGOs linked to sports, cultural activities, art promotion, promotion of the traditions of the community living in this municipality and the activities related to the promotion and protection of the rights of persons with disabilities, etc. have been supported. In addition it is noticed that NGO activities related to the agriculture sector, animal protection, etc. have also been supported. The report prepared by the municipality, contained enough information to understand the areas of financial support, beneficiaries and the funded activities.

Podujeva Municipality has also prepared and submitted its report, which contains a list of NGOs benefiting public financial support, as well as the support fields. The report was not complete, but it did contain the key data in terms of financing. From the submitted data it is noticed that most of the projects supported by this municipality are linked to sports, arts and culture activities, free activities and social services. In Podujeva Municipality as well, most of the financial support was provided based on the decision of municipal authorities without conducting any public calls.

The report of **Suhareka Municipality** contained most of the reporting requirements, including the beneficiary, the amount, project name and the purpose of the provided financial support. From these data we can notice that most of the financing provided by this municipality to NGOs is intended to supporting sport clubs, and a number of activities were related to culture, art, education and community issues.

The report filed by **Drenas Municipality** shows that most of the funded projects are related to sports, and a considerable number of projects were also related to art and culture. In the filed report it is highlighted that the support was provided directly, namely through the decisions of municipal institutions and without conducting any public calls. Whereas, the data are incomplete in the part related to the summary of supported activities. This municipality has reported that all projects are being implemented in accordance with the contracts and are all applicable for a period shorter than a year.

Vushtrri Municipality has also submitted its report on the public financing of NGOs. It is noticed that this municipality has also funded a considerable number of NGOs dealing with sports, including various sports clubs. In addition, projects of NGOs providing social services have also been funded. Moreover, this municipality has also funded/co-funded projects with foreign NGOs. Some of the projects aimed at supporting the social groups with special needs.

Vushtrri Municipality has not reported to have conducted any public calls, but the financing is mainly based on the decisions municipal authorities.

Ranilug Municipality has funded a number of small projects, mainly in culture and sports. In the case of the Ranilug Municipality as well the public financial support to NGOs was provided directly based on decisions and without public calls. The report prepared by the municipality was partially filled out.

Besides the data reported by the municipalities, Office on Good Governance has also analysed the data by the Treasury of the Ministry of Finance in order to issue a more inclusive report on the public financial support to NGOs. From the analysed data we mainly notice that the contracting at the municipal level was done directly based on the requests of the non-governmental organizations. In many cases the support was even provided with the decisions of the Assemblies of the respective municipalities. As far as the purpose of the financial support is concerned, it is mainly related to sports, culture and support for NGOs that promote local development, etc.

In 2017 as well, from the analysis of the available data, it is noted that municipalities have largely supported non-governmental organizations that operate at municipal level, namely within the municipality that provides the support. However, several non-governmental organizations that operate in a number of municipalities have benefited from more than one municipality in the Republic of Kosovo. Some of the municipalities, however, have also financed NGOs that conduct their activity Kosovo-wide, especially those active in sports and those that aim to support certain social groups in need, including persons with special needs, NGOs providing health services, NGOs that are implementing projects that are co-financed with donors, etc.

3.2.2 Number of NGOs benefiting funding from municipalities and their division according to the amounts of financial support

During 2017 a great number of non-governmental organizations have been supported at the municipal level in the Republic of Kosovo. Compared with the previous year 2016, it is noticed a decrease of the overall number of non-governmental organizations that have received financial support for their projects by municipalities. A major number of NGOs that benefited the year before have again benefited public financial support. The following figure shows graphically the number of NGOs that benefited in each of the municipalities during 2017. For comparing purposes the 2016 data on financing have also been included.

Figure 8. Number of NGOs supported according to municipalities in 2016-2017

Similar to the Central level, the highest amount NGOs could benefit was up to 5,000 Euro. The data show that the higher the benefited amount is the number of benefiting NGOs decreases.

Figure 8. The number of NGOs benefiting from municipalities according to specific amounts

3.3 Public financial support from independent agencies and other public institutions

The Assembly of the Republic of Kosovo and Independent Agencies have also provided financial support for NGO Projects or received services by NGOs during 2017. In 2017 the amount transferred from these institutions to NGOs was 286,273 Euro, while in the previous year this amount was 70,974 Euro. The NGO funding was mainly provided as part of direct agreements to provide services, while in certain cases, especially by the Assembly, specific NGO projects have been supported. See figures below:

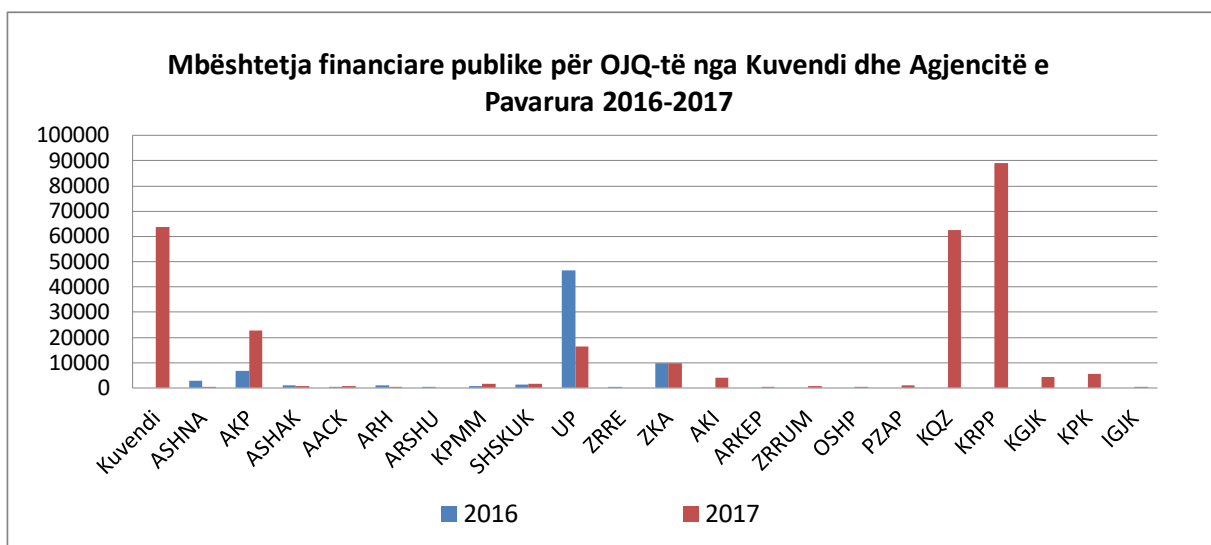

Figure 9. Support for NGOs by the Assembly and independent agencies in 2015-2016

Figure 10. Number of NGOs benefiting from the Assembly and Independent Agencies in 2016-2017

4. CONCLUSIONS AND RECOMMENDATIONS

The Regulation of the Ministry of Finance MF-No.04/2017 on the criteria, standards and procedures for public financing of NGOs for the first time regulates in a unique way the public financing of NGOs by all budget organizations. This regulation is based on the Law on Public Financial Management and Accountability. Article 53 of the LPFM stipulates that: *“The Minister shall have the exclusive authority to issue rules governing the process that shall be followed by the concerned budget organization or public authority when selecting the recipient or recipients and determining the amount or amounts to be provided as a grant, donation or subsidy. Such rules shall ensure that the process is strictly aimed at achieving the intended purpose of the Assembly when it authorized such grant, donation or subsidy in the concerned Appropriations Law.”*⁶ Therefore, public institutions, must keep in mind that the failure to observe this regulation, can directly be regarded as non-compliance with the Law on Public Financial Management and Accountability, which is the main legislation in the field of public finances in the Republic of Kosovo.

Regulation MF-No.04/2017 defines the criteria and procedures for a transparent financing and based on predetermined criteria. At the same time, the standard forms have reduced the workload of institutions in preparing public calls, assessing applications and conducting procedures in its entirety. This regulation entered into force in July 2017 therefore,

⁶ Article 53, par. 3, Law No. 03/L-048 Law on Public Finances Management and Accountability. Electronic version accessible at: <https://gzk.rks-gov.net/ActDetail.aspx?ActID=2524>

reporting on the observance of the criteria specified in this regulation is closely linked with the period after its adoption. Upon entry into force of the present regulation, any other act that regulated the public financing of NGOs is no longer applicable. However, this report includes the entire 2017 and is therefore difficult to make a division of funding prior and after this Regulation's entry into force. This is because the majority of institutions have not reported according to the requirements of the Regulation so far.

Office on Good Governance, during the preparation of this report, has tried to collect all the necessary information under the Regulation and in relation to its implementation. OGG reminded the public institutions on their task to report and asked them to prepare and submit reports in the required format, although this duty for all public institutions is stipulated by the foregoing Regulation. Therefore, during the drafting of this report, public institutions should have also reported whether they had conducted public calls for the provision of public financial support to NGOs or not? As reported above, in some of the reports received from municipalities it was noticed that public calls had been conducted, while the majority of the financial support was awarded based on decisions by the respective bodies of budget organizations and direct contracting, which may have caused lack of competition upon the provision of public financial support.

From the analyses of the Public Financial Support for NGOs in 2017 it is seen clearly that the Government of the Republic of Kosovo and other public institutions provide considerable financial support to Non-governmental organizations in the Republic of Kosovo. Non-governmental organizations are benefiting from all Kosovo municipalities; moreover, municipalities participate almost equally in providing public financial support to NGOs. Speaking of public financial support to NGOs from municipalities, most of the benefiting NGOs exercise their activity in the territory of the municipalities that provide the public financial support.

In 2017 there is an overall growth of financing in relation to the amount of financing at the central level, however, as a whole if we analyse the number of beneficiaries both at central and local level there is a considerable decline in financing compared with the previous year. That decline can be related to the entry into force of Regulation MF-No.04/2017, because the implementation of the Regulation requirements entails proper planning of the financial support and the preparation of public calls.

Even in 2017 we may conclude that there are no public records on the monitoring of the financed projects and programs of NGOs. Unlike the previous year, a significant improvement in the data concerning the naming of projects and financed activities and projects is noticed among the reporting institutions. However, a lot remains to be done and there is room to improve the reporting. On the other hand, public institutions which have not reported at all,

but also those that have reported, should prepare and publish as soon as possible their report on the public financing of NGOs, according to the Regulation requirements.

Public institutions, including ministries, municipalities and independent agencies should increase the transparency in relation to the public financial support by preparing and publishing in their web pages regular annual reports on the public financial support to NGOs. These reports should include among other: a) Name of the provider of public financial support (Ministry, municipality, agency, including specific programs through which the public financial support is provided); b) Public financial support allocation method (through calls/direct contracting); c) Public calls through which the financial support has been provided; d) Full name of financial support beneficiaries (including the beneficiary's other data, Address, Registration and Fiscal number and the data on the NGOs responsible person); e) Name of project/program or financed activities; f) The amount allocated for the financing of the project/program; g) Duration of the project and the status of its implementation; h) General and specific fields of financing; i) Direct and indirect beneficiaries, j) Main activities or services conducted during the project; k) Geographical data in relation to the location of the implemented project; l) Number of persons who have benefited or are employed through the project/program. For standard reporting purposes form no.20 shall be used, which is an integral part of the Regulation.

Through the technical assistance project the Office on Good Governance plans to help public institutions to increase their professional capacities to implement the Regulation. Therefore, during 2018, additional joint trainings and in job trainings shall be organized, and among other things they will include the capacity building for reporting on the public financial support. Institutions are encouraged to select the adequate personnel to attend these trainings, to ensure in the future the detailed implementation of the requirements of Regulation MF-No.04/2017 on the criteria, standards and procedures for the public financing of NGOs.

Public institutions need to conduct public calls for each public financial support to NGOs.

5. ANNEXES: LIST OF BENEFICIARIES ACCORDING TO INSTITUTIONS AND THE AMOUNT OF PUBLIC FINANCIAL SUPPORT IN 2017

ANNEX 1- LIST OF NGOs BENEFITING PUBLIC FINANCIAL SUPPORT FROM THE MINISTRIES OF THE GOVERNMENT OF THE REPUBLIC OF KOSOVO IN 2017
