Opening remarks by the Director of the Office of Good Governance in the Office of the Prime Minister

The Government of the Republic of Kosovo has already established a successful practice of publishing annual reports on public financial support to Non-Governmental Organizations. The year 2018 has been also successful in cooperation with civil society organizations in both central and local level Institutions of the Republic of Kosovo to implement its priorities. This cooperation is also in function of the realization of governmental objectives for transparency, accountability, and responsibilities as set out in the MF Regulation no. 04/2017 criteria, standards and procedures for funding CSOs. Also, the Government Strategy for Cooperation with Civil Society 2019-2023 addresses this component as a specific objective. The Office for Good Governance in the Office of the Prime Minister has made a continuous contribution to the advancement of transparency and accountability in providing public financial support to NGOs during 2018. This contribution is focused on providing support to public officials as well as NGOs through joint and on-the-job training, in view of the strict implementation of MoF regulation no. 04/2017 on NGO public funding criteria, standards, and procedures. This report shows an improvement in the implementation of this regulation. However, greater commitment is needed to increase transparency and implementation of this regulation. This report provides a set of recommendations that the Office for Good Governance / Office of the Prime Minister will commit to jointly implement this Regulation in practice with all public Institutions. The Office of Good Governance / Office of the Prime Minister encourages all public Institutions to strengthen their mechanisms in order to implement the requirements of the applicable legislation that relates to the public funding of NGOs. This will enable increased trust in public Institutions and partnerships with civil society organizations. The implementation of procedures, criteria, and standards for transparency, accountability, and competition will enable future objectives to be achieved.

Sincerely,

Habit Hajredini

Director, Office for Good Governance - Office of the Prime Minister

1. INTRODUCTION

The Government of the Republic of Kosovo remains committed to increasing the transparency and accountability of public Institutions and to creating mutual trust between civil society and public Institutions.

The Office for Good Governance in the Prime Minister's Office for the first time published the Public Financial Report covering the years 2015 and 2016 and in 2018 published the 2017 report. The publication of Annual Public Financial Supports for NGOs has received an estimate also positive from the European Commission Country Report for 2017, which states that "In March 2017, the Government published the first report on public funding. This is a positive step towards greater transparency of public funding. "

Regulation MF-No. 04/2017 besides its other obligations it defines in detail the responsibility that public Institutions have for reporting on public funding of NGOs. The Regulation has also defined the role of the Office of Good Governance / Office of the Prime Minister in the process of preparing the Report comprehensive public financial support for NGOs, which is prepared on the basis of reports from all public Institutions. Therefore, the form of monitoring and reporting on public financial support to NGOs under this Regulation is very well structured, including the data that must be contained in the annual report. Based on Article 26 of the Regulation, all budget organizations should prepare their report no later than 1 March for the previous fiscal year. In addition to submitting this report to the Office of Good Governance / Office of the Prime Minister, Budget Organizations should publish the same report on the website of the respective Institutions. The Office of the Prime Minister / Office of Good Governance is responsible to summarize and publish a comprehensive Public Financial Support Report for NGOs that should include any financial support provided to NGOs over the previous year in all organizational units of Budget Organizations in the Republic of Kosovo.

Even during 2018, the Government of the Republic of Kosovo and the Municipalities have continued to support the projects from Non-Governmental Organizations in various fields, with priority for the Institutions of the Republic of Kosovo and Kosovar society. This financial support for NGO projects aimed to enhance cooperation with civil society, especially with non-governmental organizations. In 2017, Kosovo has built a system with unique rules regarding public funding for NGOs, which set minimum criteria related to public funding. The Regulation is adopted by the Ministry of Finance in 2017, MoF no. 04/2017, which clearly sets out the criteria, standards and procedures of public financial support for non-governmental organizations and it has started the implementation considerably by most budget organizations, in particular Ministries and Municipalities. In addition, the Office of Good Governance at the Prime Minister's Office with the help of Donors worked with many Budget Organizations to strengthen their capacities to implement the requirements of this regulation, including joint training and on-job training. These training modules were developed with the support of the European Union Technical Assistance Project "Support to the Implementation of the Government Strategy for Cooperation with Civil Society".

From July 1, 2017, when the regulation came into force, according to which all budget organizations are obliged to comply with its requirements regarding the public funding of NGOs.

The report also notes the need to improve Institutional capacities to comply with the new requirements, pointing out that "some ministries and municipalities are not yet ready to meet their obligations under the regulation" and that "there is still a lack of technical capacity to effectively execute the allocated budget in accordance with established regulations and procedures "

During these two years, the Office for Good Governance / Office of the Prime Minister has worked with public Institutions in building their capacities in do the best in implementation of

this regulation.

The Report on Public Financial Support to NGOs for 2018 is the third report prepared at the level of the Government of the Republic of Kosovo regarding the public financial support to NGOs **and covers all budget organizations** at central and local level which in any form have provided financial support to non-governmental organizations. From the data collected by Budget Organizations, the web sites of budget Organizations and direct work delivered by OGG on capacity building for Budget Organizations, there is a **noticeable advancement in the application of the regulation regarding public funding for NGOs** .

However, there are still budget organizations that do not announce public calls and do not provide public financial support to NGOs as required by the Regulation. Though the regulation is clear in its requirements, some of the budget organizations though having announced public calls, they have not been fully in line with the requirements of the regulation.

Regarding the reporting and making publicly available the funding for NGOs for 2018 by Budget Organizations, we consider that the same leaves much room for improvement in the future. At the time when this comprehensive report was compiled, most budget organizations have not yet published reports on public funding of NGOs for 2018 on their websites, and also a large number of them have not submitted their reports to the Office for Good Governance in accordance with the requirements of MF Regulation no. 04/2017. However, some budget organizations have prepared and submitted their reports.

As a result, even this year, the Office of Good Governance, in order to make the public well informed about the financial support of non-governmental organizations, has cooperated with the Ministry of Finance, respectively the Treasury department aiming to prepare a comprehensive report based on the payments that budget organizations have executed for beneficiaries who are registered in the Treasury as Non-Governmental Organizations. In addition, Annex II indicated the data reported by the Budget Organizations, those who have fulfilled the Legal Obligation for Reporting. The publication of this report evaluates that it will contribute to increasing the transparency and accountability of public Institutions and at the same time will have an impact on improving cooperation with civil society in the Republic of Kosovo.

We assume that the publication of this report will contribute to increasing the transparency and accountability of public Institutions and at the same time will have an impact on improving the cooperation with civil society in the Republic of Kosovo.

1.1 Methodology

The Office for Good Governance / Office of the Prime Minister has requested from all budget organizations to prepare and submit reports on public funding to CSOs for 2018. The same request has been addressed to the local level through the Ministry of Local Government Administration. However, given that a large number of organizations budgets failed to submit their reports in accordance with the requirements of the MF Regulation no. 04/2017, the Office of Good Governance among other data collected, has used the Treasury database provided by the Ministry of Finance. Therefore, the Report on Financial Support to NGOs from Institutions of the Republic of Kosovo for 2018 has been prepared on the basis of data provided by budgetary organisations and data from the Ministry of Finance, respectively from Treasury. The data provided by Treasury include all payments that have been executed within the period January 1 to December 31 of the respective year for suppliers registered in the Treasury as Non-Governmental Organizations.

Considering that the data provided by the Ministry of Finance are based on payments and

not on funded projects or programs, for the purpose of preparation of this report the same data have been processed in such a way that if an NGO has received sums of money different amounts of money within one year from the same Institution or from different departments of the same Institution they are collected and presented as a single financial amount for the same NGO within the respective year indicated in the annexes attached to this report. Although certain projects within different Institutions may have been approved with higher amounts than those set out in this report since not all approved amounts may have been executed within the fiscal year to maintain the uniformity of the methodology the data used, this report presents only the amounts executed and reported by the Treasury.

In addition, the Office of Good Governance has also analyzed the websites of public Institutions to analyze public calls processes, their content, and other relevant information. We have also carefully analysed data from the Institutions that reported and presented in Annex II of this report. However, in the first part of the report, Treasury data were processed to enable a comprehensive and comparative presentation with previous years.

The Office for Good Governance in the OPM is supported by the Technical Assistance Project funded by the European Union Office in Kosovo "Support to the Implementation of the Government Strategy for Cooperation with Civil Society". OGG and the project team "Support for the Implementation of the Government Strategy for Cooperation with Civil Society" is not responsible for the accuracy of the data regarding the names of NGOs or whether the names of suppliers registered by Treasury and reported as non-governmental organizations and presented in this report are Non-Governmental Organizations registered under applicable law. The denominations are presented as received aqs such by the Treasury.

2. GENERAL INFORMATION ON REPORTING BY BUDGET ORGANIZATIONS

2.1 Reporting by Budget Organizations

In Article 26 of MF Regulation No. 04/2017 on the Criteria, Standards and Procedures for Public Financing of NGOs is clearly defined the obligation of all budget organizations for annual reporting on public financial support to NGOs.

It is worth mentioning that the Office of Good Governance in the Office of Prime Minister in compliance with the requirements of the Regulation on NGO Criteria, Standards and Procedures for Public Financing, besides the reporting requirement, has organized two information sessions for reporting officers at the local level and central to providing facilities and clarifications related to the preparation of the report. In these briefing sessions have attended representatives from many Central and Local Budget Organizations. In the reporting request, the Office of Good Governance has informed the Heads of Budget Organizations that the Regulation on MoF MoF Public Criteria, Standards and Procedures for Public Financing. 04/2017 derives from the Law on Public Financial Management and Accountability, therefore, failure to report or delay in reporting constitutes a violation of the Public Financial Management and Accountability Act. The Office of Good Governance has offered all its readiness to provide its expertise and support all budget organizations that need to prepare the annual report.

Compared to previous years, reporting has improved significantly, however this report shows that a large number of budget organizations have not submitted their report according to the requirements of the regulation. The following figure shows in percentage the number of budget organizations including Ministries and Municipalities in terms of reporting or not, as required

by the MoF-NR-04/2017 Regulation on NGO Criteria and Public Financing Procedures.

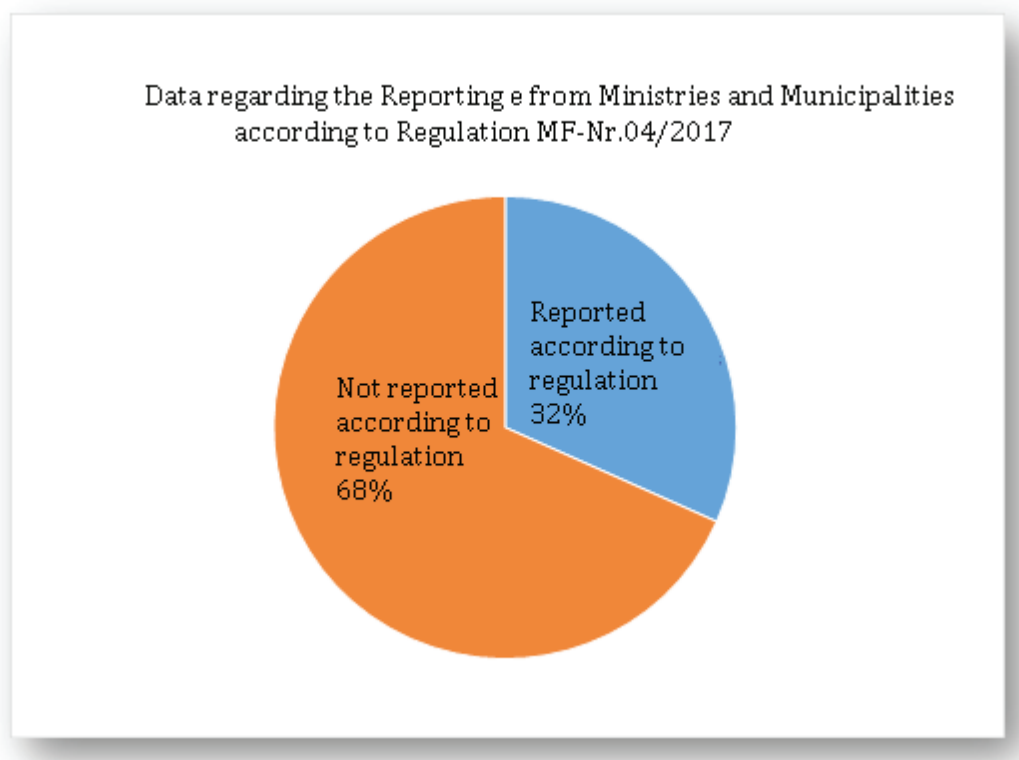

Figure 1. General data on reporting by budget organizations

The data regarding each budget organization are presented in a specific form in the following sections of this report.

3. GENERAL DATA ON PUBLIC FINANCIAL SUPPORT FOR NGOs AT THE LEVEL OF THE MINISTRIES, MUNICIPALITIES AND OTHER INDEPENDENT AGENCIES

Based on the data collected and processed on public funding to NGOs' for 2018, we can conclude that cooperation with non-governmental organizations in the implementation of governmental priorities in various fields continued throughout 2018 and moreover, in many Institutions we have an increase in funding. Also during 2018, the central level Institutions and municipalities continued to support the projects and activities of non-governmental organizations, including the funding of specific project, or direct support for NGOs and their projects.

On the bases of data obtained for 2018 shows that public financial support transferred to NGOs from public Institutions, including central Institutions(Assembly, Presidency, Office of the Prime Minister and Ministries), independent agencies and municipalities for 2018 is around 22.7 million euros, which compared to year 2017 seems to be about 6 million euros more.

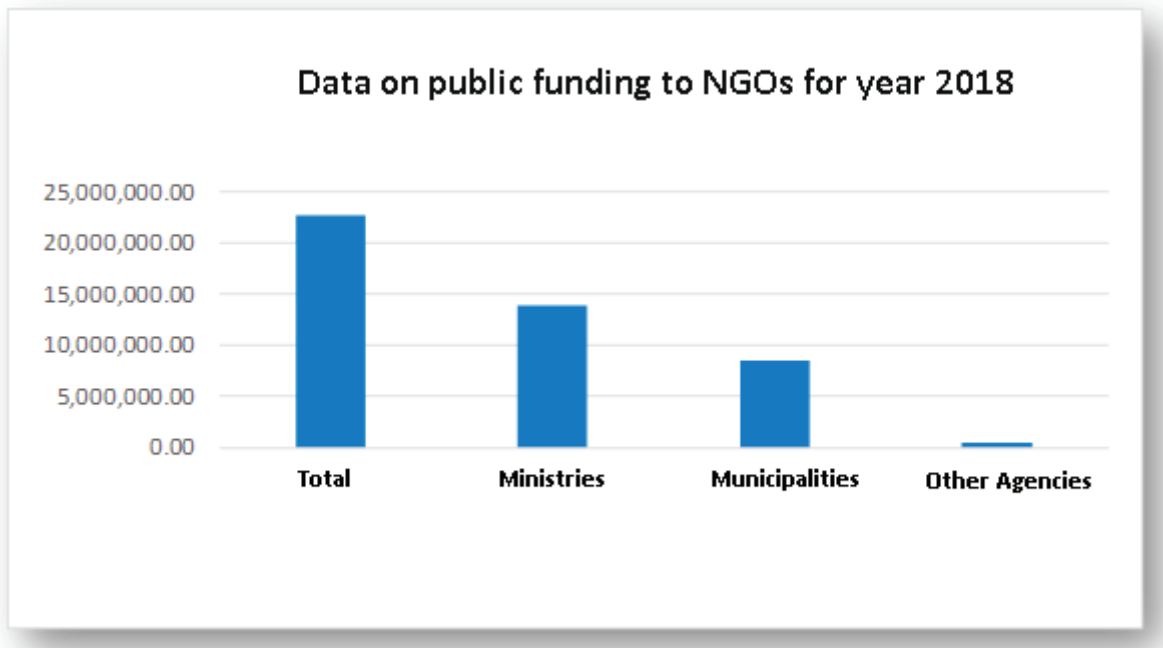

Figure 2. Data on public funding to NGOs for 2018

If we make a comparison of public funding between the year 2018 and 2017, we see an increase of around 6 million Euro in total. This increase is noticed at the level of both central and local Institutions. The following figure presents a comparative pattern the data on public financial support for NGOs in Kosovo for 2017-2018 for all budget organizations, split by ministries, municipalities and other agencies:

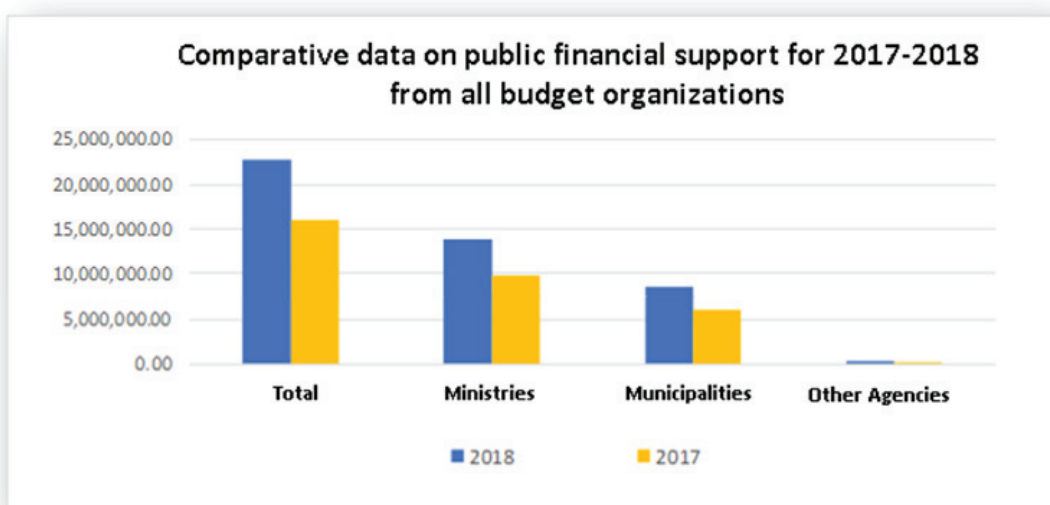

Figure 3. Comparative data on public funding to NGOs for 2017-2018

During 2018 there is an increase in the total number of NGOs that have benefited from public financial support from Budget Organizations at Municipal and ministerial levels as well as at independent Agencies and Institutions. In 2018 at Ministerial level, 793 NGOs have received financial support, while in 2017 financial support had received about 594 beneficiary NGOs. These data show that in 2018, at central level, Ministries have increased the number of NGOs benefiting from public financial support with around 200 NGOs compared to 2017.

The same increase in funding as well as the number of beneficiary NGOs is also reflected at the municipal level. At the municipal level, the number of beneficiary NGOs is higher than the

number at the level of ministries. During 2018, there're 1023 NGOs that have benefited from the budget of all municipalities, compared to 2017 that were 813 NGOs. The data presented in this report are prepared on the basis of data provided by Treasury in the Ministry of Finance, and as such they represent any form of financial support which has gone to suppliers that are registered as non-governmental organizations in the Treasury Department. This number consists the number of NGOs that have received funds from Budget Organizations. However, the same organizations have often benefited from more than one Budget Organization and the difference from the above number is around 150 NGOs at the central level and around 150 ones at the local level that have benefited funds from more than one Budget Organization.

Among the other agencies, which mainly report to the Assembly, we also have an increase in the number of NGOs benefiting from public financial support. In 2018, 46 NGOs have received public financial support compared to 18 beneficiary NGOs, as of 2017.

One of the factors that could have had an impact on this growth could be the increase of transparency and the increase of the number of public calls at the level of public Institutions according to MF regulation no. 04/2017. This is because for the first time the regulation started to apply from the beginning of the fiscal year and the same has set out criteria and procedures that Budget Organizations are obliged to respect when providing public financial support to NGOs. On the other hand, the understanding of the regulation has also increased among budget organizations, although many challenges stil remain in its implementation. Therefore, increasing the number of beneficiary NGOs for financial support can be interpreted as a sign of beginning to respect the criteria and procedures foreseen by this regulation.

The figure below shows in comparative view the number of beneficiaries of public financial support from the ministries, municipalities and other agencies for the years 2017-2018:

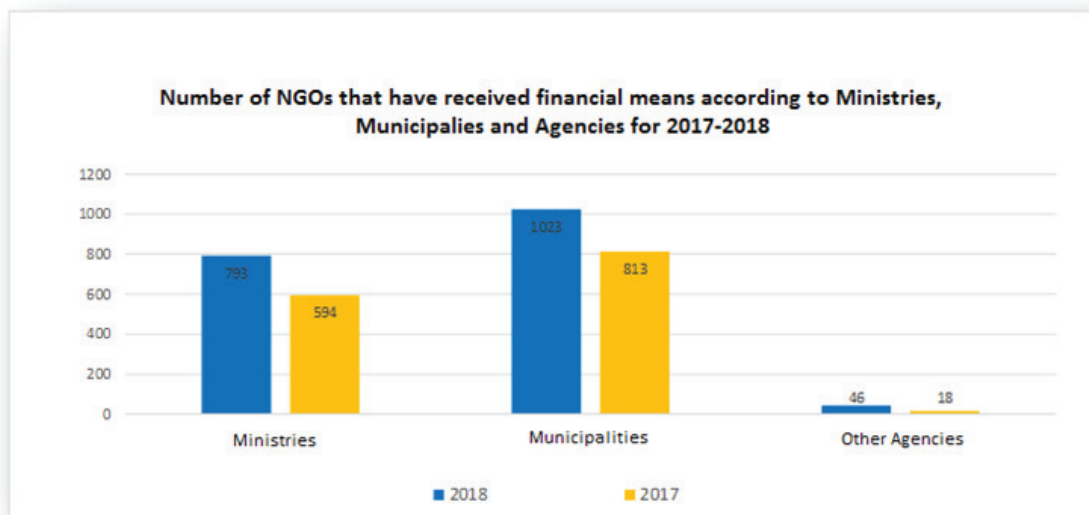

Figure 4. Number of NGOs that have received funding from budget organizations during 2017-2018

4. DATA ON PUBLIC FINANCIAL SUPPORT FOR NGOs, SORTED BY MINISTRIES, MUNICIPALITIES AND OTHER AGENCIES

4.1 General data for Public Funding to NGOs for 2018 according to Budget Organizations

The table below include the Budget Organizations, which based on data during 2018, they have made payments to suppliers registered as NGOs in the treasury database. The amount includes all payments made during the fiscal year from 1 January 2018 to 31 December 2018. These data are related to the payments as in the annexes of this report, which include the list of beneficiaries listed in those lists.

No.	Name of Budget Organizations	Payment Amount by the organization to operators registered in the Treasury as an NGO in 2018
1	OFFICE OF THE PRIME MINISTER	2,151,619.90
2	ALLOCATIONS BY GOVERNMENT DECISIONS FROM STATE RESERVE	959,400.00
3	OFFICE OF THE PRESIDENT	152,905.48

4.2 Financial Support to NGOs under the Ministries

The following data shows the amount of public financial support to NGOs according to respective ministries, which was given in 2018, and the same figures have been compared with the previous year 2017. Almost all ministries have increased funding compared to the year 2017. If we analyze the data of public financial support, we can conclude that as far as the amount of financial support is concerned, the Institutions that have mostly supported the NGO projects are the Ministry of Culture, Youth and Sports, the Office of the Prime Minister, Ministry of Labor and Social Welfare, Ministry of Communities and Returns, Ministry of Agriculture, Ministry of Health, Ministry of Innovation and Entrepreneurship, Ministry of Education etc.

It should be noted that the Ministry of Innovation and Entrepreneurship is a new ministry, as is the Ministry of Regional Development, therefore funding from these two Ministries reflects also the reduction of support from the Ministry of Economic Development and the Ministry of Agriculture which previously funded programs in similar fields. What is most noticeable at the central level is the Office of the Prime Minister, which has increased funding in 2018 for about 2 million euros, MCYS also with about 1 million euros. In addition, a considerable amount of financial resources were also spent from the State Reserve through the decisions brought by the Government of the Republic of Kosovo, benefiting several non-governmental organizations.

Figure 5, as shown below indicates graphically the public financial support data for NGOs at ministerial level, the Office of the Prime Minister and the Office of the President for 2018 compared to the previous year 2017.

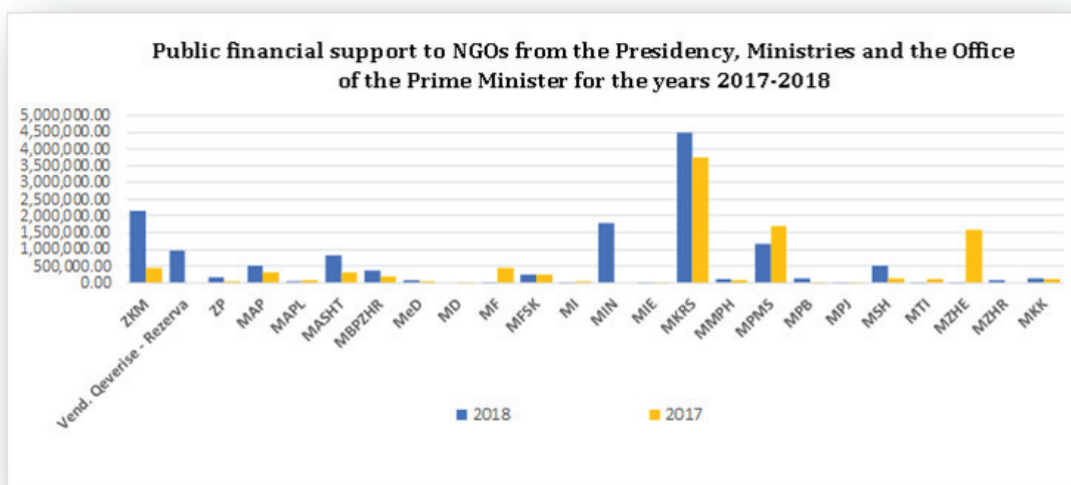

Figure 5. Amount of public financial support at the level of Ministries for 2017-2018

4.2.1 Purpose of financial support provided by the ministries

The Office for Good Governance addressed all Ministries to report on public financial support to NGOs during 2018. In addition to the request, the Office of Good Governance had also sent out the standard reporting forms. About half of Ministries have reported according to the required format. The Office for Good Governance has analyzed all the reports received and based on them has extracted the following data::

Name of INSTI-TUTEon	Main field of funding	Methods of providing support	If the submitted report is in line with the requirements of the regulation
Ministry of Diaspora	<ul style="list-style-type: none"> - Education, science - Art and culture - Free activities - Sports 	The ministry reported a public call through which the projects were funded	The report was submitted to a large extent but not complete with the information required by the regulation.
Ministry of Innovation and Entrepreneurship	<ul style="list-style-type: none"> - Sustainable development; - Economy;- - People with disabilities; - Education science and research; - Environment and nature; - Training 	The ministry reported a public call through which the projects were funded.	The report was submitted to a large extent but not complete with the information required by the regulation.
Healthy ministry	<ul style="list-style-type: none"> - Health; 	The ministry reported a public call through which the projects were funded.	The report was submitted fully in compliance with the requirements of the regulation and is among the best submitted reports.
Ministry of Regional Development	<ul style="list-style-type: none"> - Education, science, research; - Economy 	The ministry reported a public call through which the projects were funded.	The report was submitted fully in compliance with the requirements of the regulation and is among the best submitted reports.
MIA	<ul style="list-style-type: none"> - Social services - Technical training - Employment; - Support for war categories 	The ministry has not reported a public call, but instead reported to co-financing projects	The report was not submitted in compliance with the requirements of the regulation
MLSW	<ul style="list-style-type: none"> - Information Technology; - Energy; - Economy 	The ministry reported a public call through which the projects were funded.	The report was submitted fully in compliance with the requirements of the regulation and is among the best submitted reports.
MED	<ul style="list-style-type: none"> - Teknologjia informative dhe informacioni - Energjia; - Ekonomia 	The ministry reported a public call through which the projects were funded.	The report was prepared and submitted according to the requirements of the Regulation.
OFFICE OF THE PRIME MINISTER: OFFICE OF THE COMMISSIONER FOR LANGUAGES, AGENCY FOR GENDER EQUALITY, NATIONAL CO-ORDINATOR FOR YOUTH	<ul style="list-style-type: none"> - Human rights (mainly advancing the use of official languages) - Youth - Gender equality - Non-discrimination 	<p>Office for good governance has reported</p> <p>The Office of the Language Commissioner has reported one public call</p> <p>The National Youth Coordinator has reported one public call</p> <p>The Agency for Gender Equality has reported one Public Call</p>	Reports from Offices / Agencies within the OPM that have been received are in line with the requirements of the regulation.

MLGA	-	-	The Ministry has stated that it has not funded NGOs
MF	-	-	The Ministry of Finance reported that it did not provide public financial support, except for some contracted services.
Ministry of Justice	-	-	The Ministry has stated that it has not funded NGOs

Some of the Institutions that provide the largest public support at Ministerial level have not submitted their Report on funding for 2018.

Although the data provided by Treasury in the Ministry of Finance and also other accessible data were not complete to understand the purpose of public financial support, as well as the supported objectives, from those data that the Office for Governance collected seems that the public financial support is to some extent in line with the strategic objectives and the area of responsibility of the Institutions / ministries that provide this public financial support. For the purpose of public information, the Office for Good Governance has analyzed the data of all payments made by these Institutions and based on those basic data available we can conclude that most of the Ministries have supported NGOs in the field of their responsibilities and priorities. However, there are also cases of financial support for NGOs, where support is not directly related to the area of responsibility of Institutions that provide financial support.

Within the Ministry of Culture, Youth and Sports, which is the largest NGO financier for 2018, it is noted that the biggest support has gone to the federations and sports clubs of different sports. Federations and sports clubs in Kosovo are registered as NGOs, so in this report they are presented as non-governmental organizations. Within this ministry, a large number of NGOs have been supported that have implemented projects in the field of culture, art, etc. The Office of the Prime Minister has mainly supported NGOs that have implemented projects in various areas of benefit coming from minority communities in the Republic of Kosovo, in particular from the Serb community. The Prime Minister's Office has announced public calls mainly by the Office of Community Affairs, Office for Good Governance and Office of Language Commissioner.

Taking into consideration the basis of the available data, it is difficult to make a distinction between funded projects and programs and direct support or contracting for the provision of services or purchases by NGOs, within these Data the contracted services are also included, including education services, training, etc. provided by registered organizations as non-governmental organizations. For instance, many of the central Institutions have paid for the training services provided by the American University in Kosovo, which is registered as a non-governmental organization. Accounting and auditing training were also included, as the organizations that have provided those services are registered as non-governmental organizations.

4.2.2 Number of Beneficiary NGOs funded by Ministries and breakdown by amount of financial support

Figure 6 below shows the number of beneficiary NGOs within the Office of the Prime Minister, the Ministries and the Presidency. The following data are processed in such a way that although in many cases NGOs have received more than one payment from the same Institutions, the following figure presents the processed data on the number of beneficiaries within each ministry, which means that even in cases where an NGO has benefited more than once a year, for the purposes of the report it is considered as a single beneficiary NGO. This means

that the amount given may have supported more than one project within the year. Also, in many cases it has been noted that payments to NGOs have come from different economic codes within the same budget organization, which points out inappropriate planning by Budget Organizations.

Figure 6 shows that the largest number of beneficiary organizations are within the Ministry of Culture, Youth and Sports, Office of the Prime Minister, Ministry of Agriculture, Ministry of Labor and Social Welfare, Ministry of Health, Ministry of Diaspora, Ministry of Innovation and Entrepreneurship and Ministry of Regional Development. Most benefiting NGOs come from the Ministry of Culture of Youth and Sports, i total 528 non-governmental organizations, followed by the Office of the Prime Minister with 141 beneficiary NGOs, Ministry of Regional Development with 82 beneficiary NGOs, the Ministry of Labor and Social Welfare with 88 ones, Ministry of Innovation and Entrepreneurship with 57 beneficiary NGOs and so on.

Thus, from the public financial support to NGOs provided at level of Ministries for 2018, 793 NGOs have benefited from financial support, and as noted above, there is an increase in the number of beneficiary NGOs compared to the previous year for around 200 beneficiary NGOs. The majority of NGOs that have benefited financial support in 2018 have also received support in previous years. The following figure shows the number of NGOs benefiting from public funds for 2018 according to each ministry, including the Office of the Prime Minister and the Presidency. It should be noted that some of the beneficiaries have benefited from decisions taken by the Government of the Republic of Kosovo and the funds have been executed from State reserves code, the Treasury. For comparative purposes we have included data on the number of beneficiaries from the previous year for each of the ministries and other Institutions.

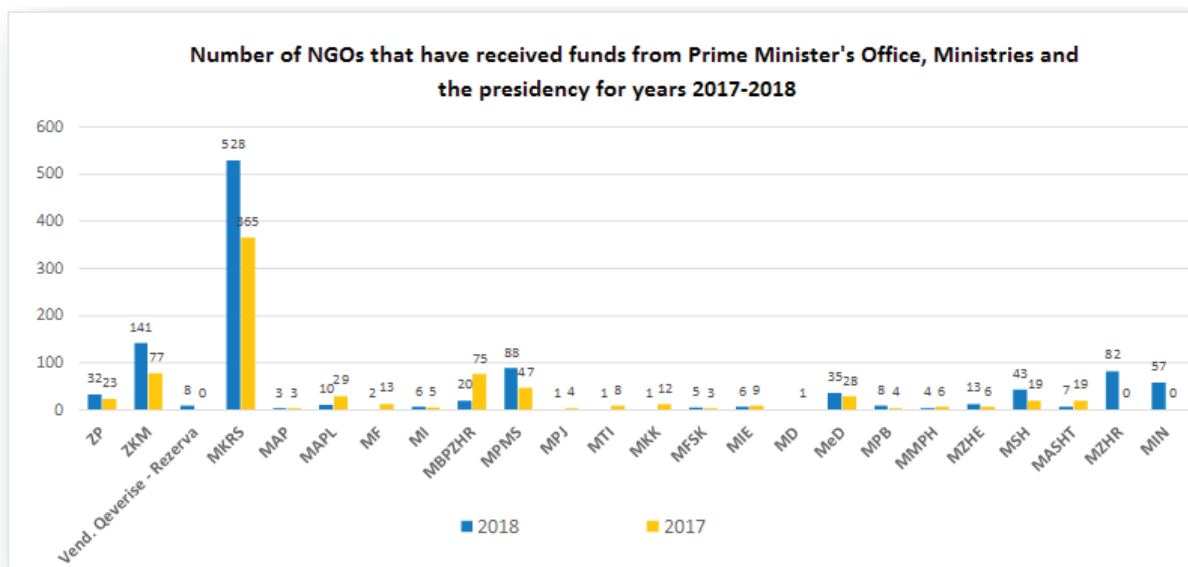

Figure 6. Number of beneficiary NGOs by Ministries for the years 2017 to 2018

Based on the analysis of processed data on public financial support to NGOs provided by the Ministries of the Government of the Republic of Kosovo, we can see that there is a change in the number of NGOs according to the amounts received by the public Institutions. Although these amounts are cumulative by all ministries, it is noticed that compared to previous years, there is a tendency of the amount received from NGOs. There's also a decrease in the number of NGOs that have received funds up to 1000 euros, while we have a considerable increase in the number of NGOs that have benefited over 5000 euro.

The figure below shows graphically the data related to the number of beneficiary NGOs according to the respective amounts, and at the same time comparisons were made with the previous.

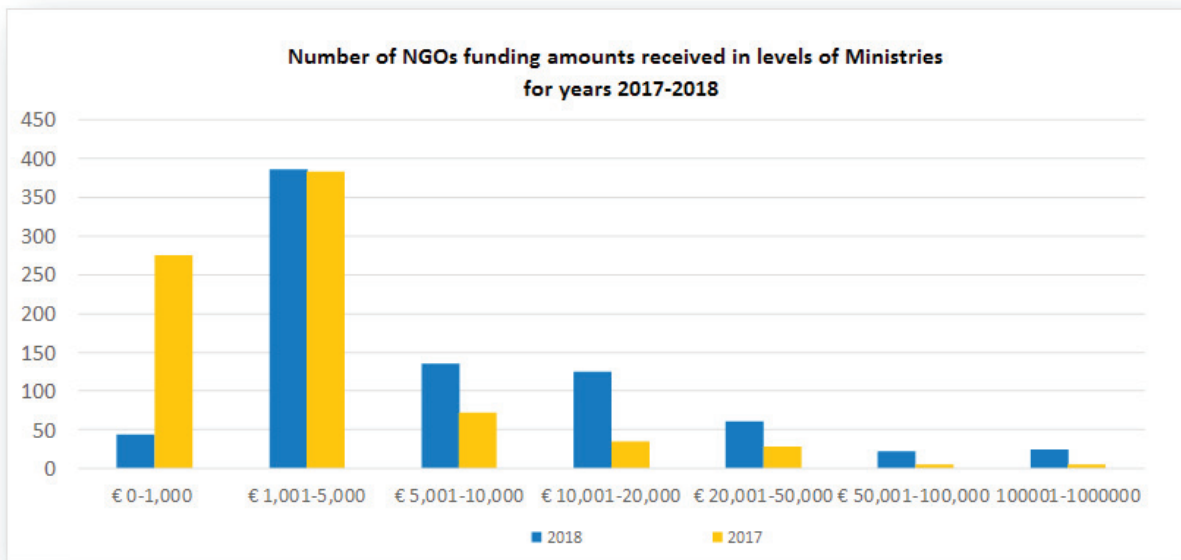

Figure 7. The number of beneficiary NGOs by specific amounts within ministries

4.3 Support from Municipalities

In 2018, Kosovo count a total of 38 municipalities, which are budget organizations within the Law on Public Finance Management. Out of these 38 municipalities, 37 of them provided public financial support to non-governmental organizations in 2018. Treasury data from the Ministry of Finance show that in 2018 a total of € 8,490,563 was transferred to the accounts of non-governmental organizations by municipalities. If we compare the amount of public funding for NGO projects from municipalities in 2018 to those of 2017, there is an increase in funding of non-governmental organizations at the municipal level by about 2.4 million euros in 2018. The following figure shows public financial support according to each municipality for 2018, comparing with the previous year.

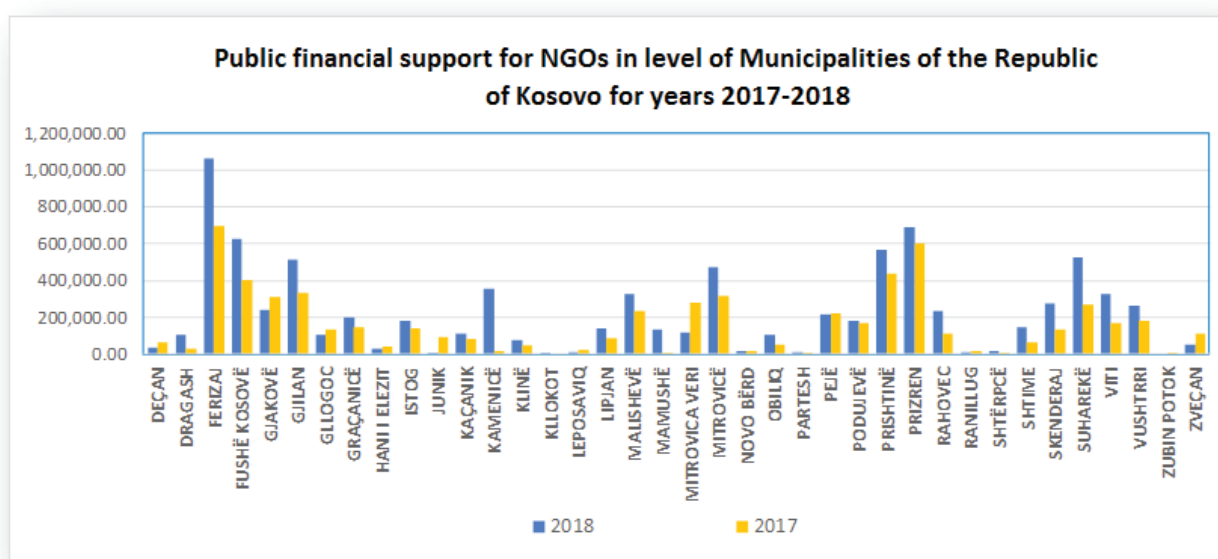

Figure 8. Public financial support for NGOs from municipalities 2016-2017

4.3.1 Purpose of financial support provided by municipalities

The Office for Good Governance addressed all Municipalities through the Ministry of Local Government Administration to report on public financial support for NGOs provided during 2018. In addition to the request, the Office for Good Governance had also provided them with standard reporting forms. Only a small number of municipalities reported in the required format. The Office for Good Governance has analyzed all the reports received and from these reports has released the following data:

Name of INSTITUTEon	Main area of financing	Method of given support	If the report is submitted in line with the requirements of Regulation
Drenas	<ul style="list-style-type: none"> - Sports activities; - Cultural and artistic activities, - Persons with disabilities - Social services 	<p>2 public calls have been reported, the Directorate for Health and Social Welfare;</p> <p>Directorate of Culture and Sports</p>	<p>In some cases there was also direct support without a public call; mainly for sports activities.</p> <p>The submitted report is largely met with the required data.</p>
Graçanica	<ul style="list-style-type: none"> - Culture, - Youth - Spors 	<p>The Municipality reported two public calls through which the projects were funded.</p> <p>The municipality has also reported some direct NGO funding without a public call</p>	<p>The report was submitted fully in compliance with the requirements of the regulation and is among the best submitted reports.</p>
Malisheve	<ul style="list-style-type: none"> - Activities of sports clubs are mainly supported; - Cultural and educational activities; 	<p>a public call has been reported through which applicants have benefited.</p>	<p>The report was submitted in compliance with the requirements of the regulation;</p>
Mitrovica	<ul style="list-style-type: none"> - Human and Children's Rights; - People with disabilities 	<p>The municipality has reported a public appeal in the field of human and children's rights</p>	<p>raporti është dorëzuar jo i plotë me të dhënat e kërkuara sipas rregullores.</p>
Peje	<ul style="list-style-type: none"> - Culture, - Youth, - Sport 	<p>The municipality reported a public call through which the projects were funded. The report contains data only from Directorate of Culture Youth and Sports;</p>	<p>The report was submitted in compliance with the requirements of the regulation.</p>
Rahovec	<ul style="list-style-type: none"> - Culture, arts, youth - Sport; 	<p>The municipality has reported a public call;</p> <p>The municipality has also reported direct NGO funding through decisions</p>	<p>The report was submitted to a large extent according to the requirements of the regulation.</p>
Suhareke	<ul style="list-style-type: none"> - Mainly sports clubs and sporting activities are supported, - Cultural activities, including youth activities; 	<p>there was no public call and funding was provided by decisions;</p>	<p>The report is submitted partially completed</p>
Shtime	<ul style="list-style-type: none"> - Sports activities; - Youth activities; - Support for people with disabilities - Social services; 	<p>The Municipality has reported two public calls;</p> <p>Direct supports were also reported;</p>	<p>The report was submitted to a large extent according to the requirements of the regulation</p>

Vushtrri	<ul style="list-style-type: none"> - Culture, Arts, - Sport, - Human rights; - Social services; - Demokracia 	The municipality has reported a public call;	The report was submitted to a large extent according to the requirements of the regulation.
Prishtinë		The Municipality of Prishtina has implemented several public calls	The Report from Prishtina Municipality was submitted after the deadline and was not submitted in the required standard form.
Podujeve		Municipality of Podujeva has implemented a public call	The report from Municipality of Podujeva was submitted after the deadline, and was not submitted in the required standard form.

Office for Good Governance in the OPM based on the requirements of Regulation MF No. 04/2017 through the Ministry of Local Government Administration has requested from the municipalities to report separately on the public financial support they provided during 2018. However, despite the notification of legal requirements and the requirement to publish reports and submit to the Office of the Prime Minister according to the requirements of the Regulation, not all municipalities have reported in the required form according to the Regulation MF No. 04/2017. Most of municipalities have not submitted the reports in accordance with the requirements of regulation MF No. 04/2017. Even this year a number of municipalities, 9 municipalities have reported in the standard reporting format, while the data are presented in the table above.

In addition to the data reported by the municipalities, the Office of Good Governance has also analyzed Treasury data from the Ministry of Finance to produce a more comprehensive report on public financial support for NGOs. From these data we can see that mainly at the municipal level the contracting was done directly, and on the basis of the request of non-governmental organizations. In many cases, support was also provided by decisions of the Municipal Assembly of the respective municipalities. Regarding the purpose of financial support, it mainly relates to sport, culture, support for NGOs that promote local development.

Also during 2018, from the analysis of the available data, both from reported data and Treasury data it is noticed that the municipalities have mainly supported non-governmental organizations operating at the municipal level, thus within the territory of the municipality that provides the support. However, some non-governmental organizations operating in a larger number of municipalities have benefited from more than one municipality in the Republic of Kosovo.

Nevertheless, some of the municipalities have also funded NGOs operating in the entire territory of the Republic of Kosovo, in particular sports-related NGOs and those which are intended to support certain society groups in need including vulnerable persons, NGOs that are providing health services, NGOs that are implementing projects that are co-funded with donors, etc.

Although many municipalities have not reported, from the analysis of the data published on their websites it is noticed that they have announced public calls as required by the regulation. This implies that the implementation of the regulation has been implemented throughout the territory of the Republic of Kosovo. However, there is still work to improve public calls and the selection process of beneficiaries for public funds.

The Office for Good Governance has analyzed the public calls of some of the Municipalities that have provided large financial support both by amount and by the number of beneficiaries, and has noticed that there is still room for improvement in implementing the provisions

of the regulation. Although this section presents an analysis of the data of the Municipality of Prishtina as one of the Municipalities that has provided the largest public support for NGOs, similar challenges are encountered in almost all municipalities and other Institutions providing public financial support for NGOs during 2018.

Municipality of Prishtina is one of the municipalities that is in the first place at the municipal level for providing Public Financial Support. However, this municipality did not submit the Report on public funding to NGOs in accordance with the requirements of the regulation. The Municipality of Prishtina has submitted a report with one month delay but it does not contain the required information according to the regulation and the standard form. In the section below, we have represented some data that are apparent from a simple analysis of public calls and the list of beneficiaries published during the process of beneficiary selection. The data published on the website of Municipality of Prishtina, it turns out that during 2018 four public calls have been published, with a maximum funding sum of 550,000 euros. From the analysis of public calls it can be ascertained the following findings:

Positive sides

- *Four public calls have been announced, defining priority areas, as well as activities that will be supported through public calls;*
- *The terms of application have been set including deadlines and how to apply;*
- *Public calls have been opened with regard to the appointment of external members of the evaluation commission;*
- *Preliminary and final results have been published on the municipality website;*

Challenges:

- *The public call has set the minimum and maximum funding per project, however, it did not indicate the approximate number of beneficiary NGOs;*
- *The difference between the minimum and the maximum amount for the project was too high, 300 euros minimum and 10,000 euros maximum.*
- *From the published results, we can see that compared to the amount they have applied, almost all applicants have benefited only a symbolic sum. This raises doubts that the projects with which applicants have applied could not be fully implemented with the budget being given, whether projects have been in line with requirements of the call, or they should have been fully funded. The regulation allows correction of the amount only if the budget is not real. But the budget organizations have no right to support the project as a whole and to fund it with a minimum amount. While they are not entitled to intervene at all in the activities. Such intervention violates one of the basic principles of the regulation, that is the competitiveness.*
- *In two out of four public calls businesses were allowed to apply, while in all calls even individuals were allowed to compete. In addition, the public call has not determined how much is the amount of funding per individual, the amount for businesses and for NGOs, which is in contradiction of the requirements of the Regulation on Criteria, standards and Procedures for Public Financing to NGOs. This has caused that in those calls not only NGOs were competitive but also businesses and individuals.*
- *The results are not published according to the ranking points required by the Regulation. Moreover, the maximum score system (0-100) is not applied in line with the requirements of the regulation and appropriate manuals.*

Some recommendations for future improvements:

- *Regulation on Criteria, standards and procedures for public funding to NGOs should be applied accurately;*
- *NGOs, businesses and individuals should not compete among themselves within the same call;*
- *If the projects meet the criteria and are in line with requirements of the call and if the budget is real, they should be supported as a whole, and the municipality should not intervene in the budget or activities.*
- *The call should clearly specify the approximate number of benefiting NGOs and not leave the whole process on decision-making of the commission.*
- *The difference between the minimum and maximum amount for a project should not be too large. If necessary, it is recommended that the call be divided into priority areas, and indicate for each priority area what is the minimum and maximum amount, and which is the total amount of funding for each priority area. This will enable fair competition among applicants within the defined priority areas*

Municipality	Name of call	Date of call	Priority areas	Total amount	Min. Amount EUR	Max. Amount EUR	No. Of beneficiary NGOs	Additional comments	Kohëzgjatja

4.3.2 Number of beneficiary NGOs from Municipal Financing and breakdown by amount of financial support

At the level of Municipalities in the Republic of Kosovo, a large number of non-governmental organizations have also been supported during 2018.

Compared to the previous year 2017, there is an increase in the total number of non-governmental organizations benefiting financial support from municipalities for their projects. Beneficiaries of public financial support are a large number of NGOs that have also benefited from the previous year. The following figure shows graphically the number of NGOs that benefited from each of municipalities during 2018. For the purpose of comparison with the previous year, we've also included the data on funding from 2017

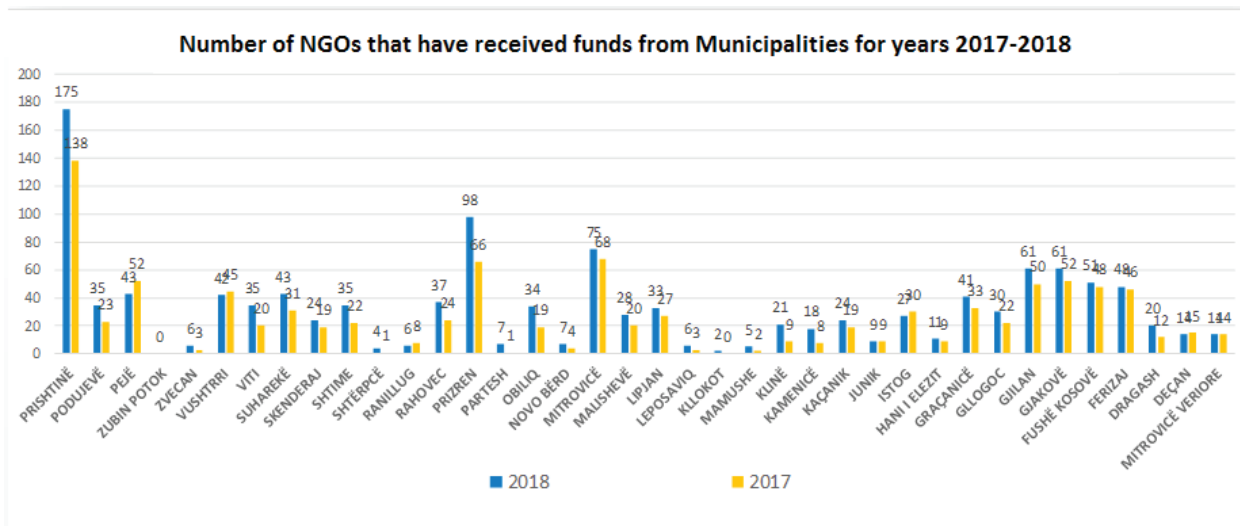

Figure 9. The number of beneficiary NGOs by municipalities for the period 2017-2018

In the same way as in the Central level, the largest number of NGOs have benefited amounts up to 5,000 euros. The data show that the bigger the amount of financial support was, the number of beneficiary NGOs was smaller. From the data it can be seen that the number of beneficiary NGOs with amounts up to 5000 euros has increased compared to 2017. Also, we have an increase in amounts up to 10,000 euros. These data are presented in the following figure:

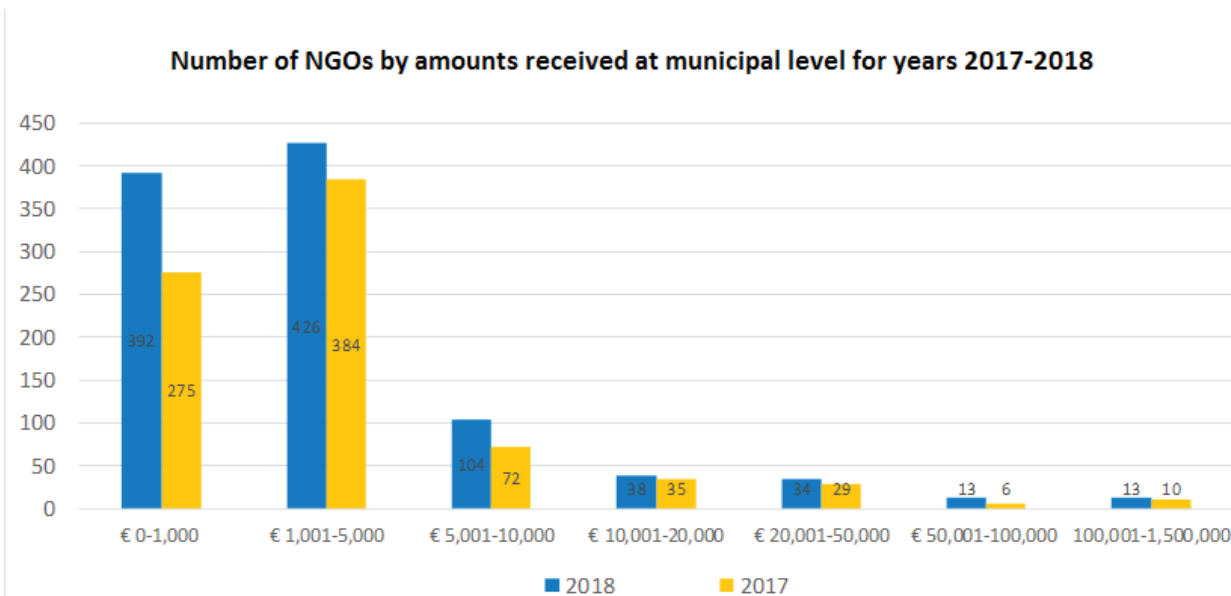

Figure 10. The number of beneficiary NGOs within the municipalities by specific amounts

4.4 Public financial support from independent agencies and other public Institutions

Both the Assembly of the Republic of Kosovo and the Independent Agencies have also provided financial support to NGO projects or have received services from NGOs during 2018. In 2018, the amount transferred from these Institutions to NGOs was 407,120 euros, while in the previous year this amount was 221,974 euros. The funding for NGOs has gone mainly as part of direct agreements to provide services and in specific cases, especially by the Assembly, specific NGO projects have been supported. See the following figures:

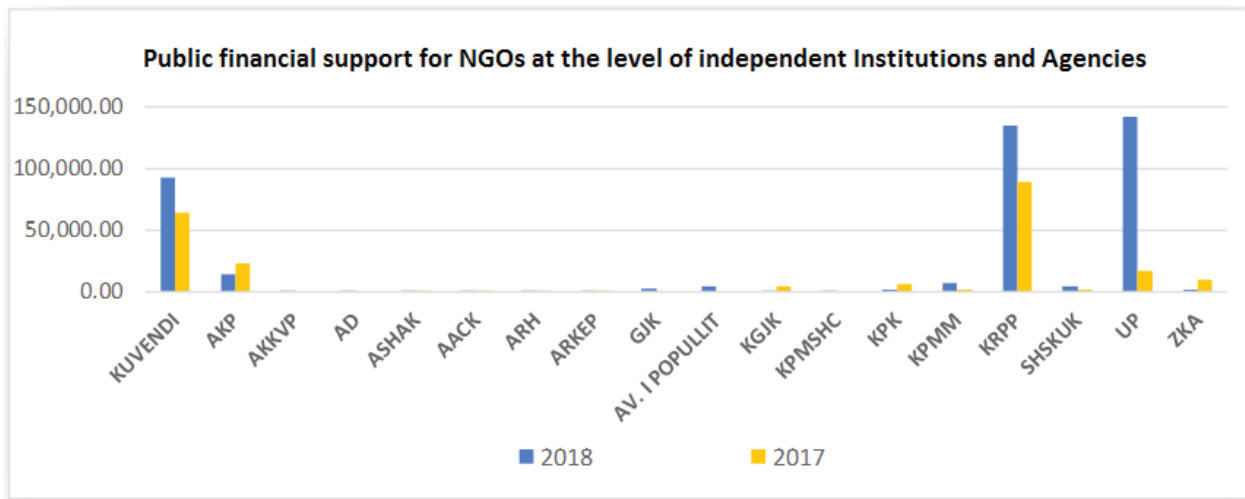

Figure 11. Support to NGOs by the Assembly and Independent Agencies and Institutions 2017-2018

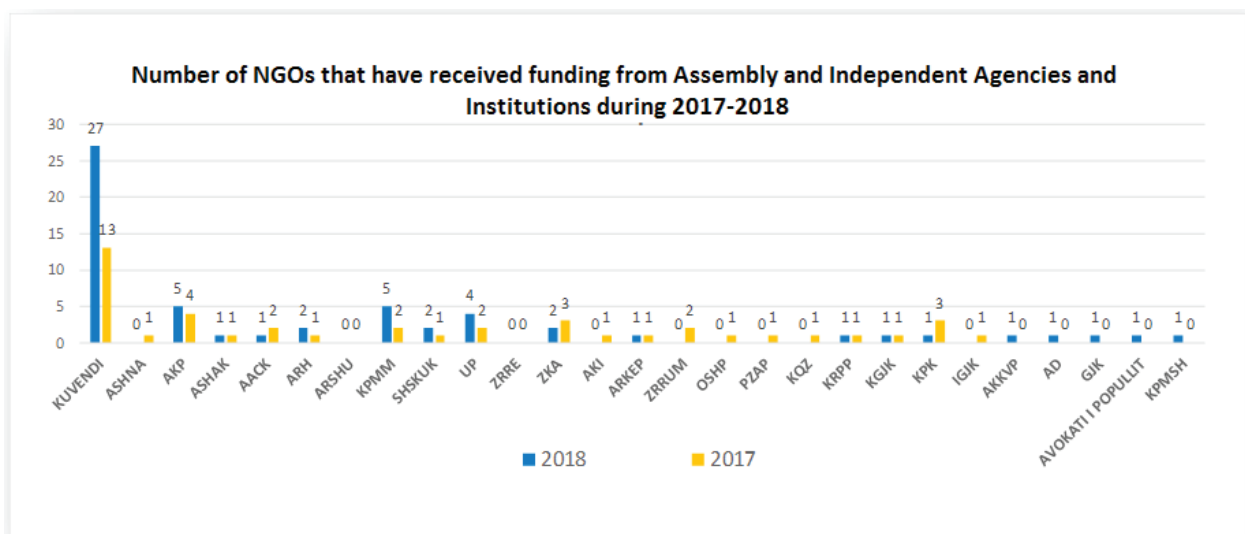

Figure 12. Number of NGOs benefiting from the Assembly and the Independent Agencies 2017-2018

5. CONCLUSIONS AND RECOMMENDATIONS

The regulation of the Ministry of Finance MF no. 04/2017 on criteria, standards and procedures on public funding to NGOs uniquely regulates public funding of NGOs for all budget organizations. This regulation is based on the Law on Public Financial Management and Accountability. Article 53 of the LPFMA states: *“The Minister is expressly authorized to issue the rules that must be respected by budget organizations or public authorities when selecting the recipient or recipients and determining the amount or amounts that will be given in the form of grant, donation or subsidy”*. These rules must ensure that the process is aimed at achieving the goals of the Assembly when it has authorized the grant, donation or subsidy concerned in the relevant law on budget allocations.¹ Therefore, public Institutions should bear in mind that non-implementation of this regulation can directly be considered as non-compliance with the Law on Public Financial Management and Accountability, which is the main legislation in the field of Public Finances in the Republic of Kosovo.

Reporting of public Institutions should be structured in standard forms as required by the regulations and enable the Office of Good Governance not only to prepare a Comprehensive Report on Public Financial Support to NGOs but at the same time to ensure transparency the use of public funds . Budget Organizations should report any public financial support granted to entities that are registered as non-governmental organizations.

The analysis of data on public financial support for NGOs for 2018, it is clear that the Government of the Republic of Kosovo and other public Institutions provide substantial financial support to non-governmental organizations in the Republic of Kosovo. This public financial support has increased in 2018, including the number of NGOs benefiting financial support both at ministerial level and at municipal level.

From the analysis of the reported data, but also from the data collection done by the Office of Good Governance, there is a noticeable improvement compared to the previous year regarding the transparency of financing to NGO Projects. This is due to the fact that the number of public calls by public Institutions has increased considerably. However, there are still many cases of direct public financial support through ad hoc decisions.

Beneficiary non-governmental organizations are from all municipalities of Kosovo, taking into account the fact that the municipalities participate almost in equal manner in terms of public financial support for NGOs. When we talk about the public financial support for NGOs at the municipal level, most beneficial NGOs operate in the territory of municipalities from which public financial support was provided.

From the data reported for 2018, we can consider that there is an improvement in the monitoring of NGO-funded projects and programs. Unlike the previous year, the reporting Institutions noted an improvement in data related to the designation of projects as well as the activities of funded projects. However, there is still much work and room for improving reporting. On the other hand, public Institutions that have not reported at all should prepare and publish as soon as possible their report on public funding of NGOs for 2018, as required by the regulation.

Public Institutions including ministries, municipalities and independent agencies should increase transparency regarding public financial support by preparing and publishing on their websites regular annual reports on public financial support to NGOs.

These reports should include among other things: a) The name of the public financial support provider (Ministry, municipality, agency, including specific programs within which public financial support is provided) b) The method of allocating public financial support (through direct

¹ Article 53, Par. 3, Ligji Nr. 03/L-048 Law on Public Financial Management and Accountability. Electronic version available in this link: <https://gzk.rks-gov.net/ActDetail.aspx?ActID=2524>

call / direct contract) c) Public call through which financial support is provided; d) Full name of beneficiaries of financial support (including other beneficiary data, Address, Registration Number and Fiscal Number and data for the responsible person of the NGO); e) Name of the project / program or activities financed; f) Amount given for funding the project / program ; g) Duration of the project and the status of its implementation; h) General and Specific areas of Financing; i) Direct and indirect beneficiaries; j) Main activities or services implemented within the project; k) Geographical information regarding the place of project implementation; l) The number of persons who have benefited or are employed within the project / program. For the purpose of standard reporting, form 20 must be used, which is an integral part of the regulation, should be used. It should be noted that there is no improvement in this regard compared to the previous year.

The Office for Good Governance with the support of the European Union's Technical Assistance Project has worked during 2018 in capacity building of public Institutions, including on-the-job training. These training sessions are seen to have given their positive effect on improving the implementation of the regulation in many public Institutions. Also during 2019, OGG in cooperation with the Ministry of Finance will organize additional joint training and on-the-job training, which will include, among other issues the capacity building in reporting on public financial support. Institutions are encouraged to select the appropriate staff to attend these training sessions in order to comply with the requirements of the MF Regulation no. 04/2017 on criteria, standards and procedures for public funding the NGOs .

Specific recommendations for budget organizations regarding public calls and proper implementation of the Regulation:

- Public Institutions should publish public calls for each public financial support to NGOs.
- Budget Organizations should set clear criteria in public calls in accordance with the requirements of the regulation. These criteria should also include the types of eligible activities, the types of eligible and ineligible expenses, the minimum and maximum amount of funding, and other specific requirements required by Regulation MF . 04/2017 on criteria, standards and procedures for public funding to NGOs .Bazuar në kriteret e RregulloresMF-Nr. 04/2017, konkurrueshmëria duhet të jetë vetëm në mes të NGO-ve dhe jo në të njëjtën konkurrencë të përfshihen edhe individët dhe Bizneset, siç ka ndodhur në disa nga thirrjet publike të Organizatave Buxhetore.
- Budget Organizations issuing the public call should not determine huge differences between the minimum and maximum amounts for projects, as happened with many public calls during 2018. This will create a lot of problems in determining the beneficiaries and adequate evaluation. It is recommended that budget organizations separate public calls into priority areas, and if necessary within these calls and priority areas, determine the minimum and maximum amounts and the total amount within the priority area to enable a comprehensive approach and to enable a fair evaluation of project proposals.Organizatave Buxhetore duhet të aplikojnë dispozitat e Rregullores ashtu siç janë dhe nuk kanë të drejtë të përjashtojnë aplikimin e ndonjë dispozita me rregullore të tyre siç ka ndodhur në disa prej komunave.
- The results analysis of public calls, including amounts of the financed projects , indicate that in many Institutions, although the minimum and maximum amount for the project have been determined and NGOs have applied within these amounts, in practice in many cases they have accepted only the minimum amount. This may bring into questions the possibility of realizing projects as a whole with smaller amounts funded . As a rule, in a public competitive call, if the projects meet the criteria of public call and are in

line with the public call requirements (within the call's minimum and maximum limits), and if the budget is real, they should be supported as a whole, and the Institution should not intervene in the budget or in activities. Such interventions would interfere with competitiveness. Interventions can only be made if the budget organization considers that the budget is not real (inflated or too low) to carry out projects with which NGOs have applied.

- Reports on public funding to NGOs according to the standard form of regulation, budget organizations must publish on their websites, by March 1 of each year for the previous year. Budget Organizations that have not yet published the reports and who did not submit to the OPM should do publish immediately in their websites the Report for financing NGO projects for 2018.
